The **Henderson County Information Technology** ("IT") Department provides information technology services to all Henderson County departments, assisting in the technology implementation process and maintaining information systems countywide. The IT department also includes the [GIS Division](#) [3].

**Essential Departmental Functions:** The IT Department is responsible for the selection, installation and support of computer hardware and software, administration of the county's telecommunication system, and provides onsite computer training to county personnel. The mission of Henderson County Information Technology is to work in partnership with Henderson County departments to manage IT resources and provide IT services which assist in the pursuit of Henderson County's mission.
